

## Sustainability 2021

Temmentec is located in the Emmental region in the heart of Switzerland, immersed between hills and forests, where a deep respect for the environment and a conscious use of natural resources is part of the DNA. With our commitment to act in a sustainable and ethical way, we make an important contribution to a greener future worth living in.

Sustainability in all its aspects is a core part of our company strategy and thus an integral part of all our processes and operations.

- Temmentec AG is ISO14001 certified.
- As of 2022, we will solely use electricity produced by hydropower.
- We are participating in a national program where we have committed ourselves to reduce the overall carbon dioxide output by 2% every year.
- All water used originates from a local spring and is treated and demineralized in-house.
- We are using heat from a district heating network.
- We have implemented a strict waste separation concept in all areas.
- Special waste such as raw materials, bulks etc. is disposed of in accordance with a certified waste management system and handled by a specialized company.
- Continuous process improvements to reduce waste in all production steps.
- By the end of 2021, our company will be RSPO (Roundtable on Sustainable Palm Oil) certified.
- Charging station for electric cars to enable and promote the change to e-mobility.
- Whenever external storage of goods is needed, we use storage facilities close to the factory in order to reduce transportation routes to a minimum.
- For construction activities, we are collaborating with local craftspeople in order to support the local economy and to limit the emissions caused by transports to a minimum.

Together with all our partners, we are committed to manufacture Skin Care products fulfilling the highest standards in terms of quality as well as sustainability.
